Emergency Flood Relief for Ancash, Peru

#SolidarityAncash represents cultural heritage professionals who work in the rural Ancash region of Peru. In addition to research and local community empowerment and development, we respond to the expressed needs of the Peruvian communities who host our research. The residents in the rural villages of Cosma and Nivín asked for our assistance in recovery efforts from the floods that are currently devastating their homes and life sustaining agricultural fields. The materials we fund are based on those specifically requested by the community residents. We are working with those residents to assure that we supplement but do not duplicate materials they anticipate receiving from other sources. Our budget has no administrative expenses.
